## New Features in Vault V12 API (11.5.3 Release)

*Release Date: June 5, 2015*

We are pleased to bring you the following enhancements to the V12 API in this week's release. Refer to the [Vault Release Notes](#) for additional information about the 11.5.3 release. See the [Vault Developer Portal](#) for API documentation.

### Updates to Documents API

The Documents API now includes the *filename\_v* document field. The new field is configured on the *base\_document\_v* type and indicates document file name with the file extension.

### Updates to Lifecycles API

The Lifecycles API now includes the *unclassified\_v* lifecycle. The new lifecycle is automatically assigned to the *undefined* document type when uploading documents in an *unclassified* state.

### Export & Import Lifecycle Role Override Rules

The API allows you to retrieve (export), create (import), update, and delete lifecycle role defaulting metadata (assignment rules). This enables exporting and [Feedback](#)

configuration data.

## Notable API Fixes

Issue	Issue No.
When viewing Document Metadata via the API, the <code>external_id__v</code> document field shows as an “ <code>editable=false</code> ” when it should be set to <code>true</code> .	DEV-61572
When performing workflow queries in API v11, users receive an error message.	DEV-62792
