New Features in Vault V7.0 API (7.0.0 Release)

Release Date: November 4, 2013

We are pleased to bring you the following enhancements to the V7.0 API in this week's release.

User Administration at Domain Level

We've updated the User API to support managing users at the domain level. Admins are now able to add domain users to their vaults, view users across vaults in the domain, search for and filter users across the domain. In addition, the User collection API now supports pagination.

API Bug Fixes

Issue	Description
21629	Document properties marked as inactive will now stay in the metadata for related document types.
23879	The User property <code>IS_DOMAIN_ADMIN__V</code> can no longer be set on user creation in APIs prior to version 7.0.
23880	The User property <code>USER_TYPE_ID__V</code> can only be set to Vault Owner for users who currently have the Domain Admin user type.
